

ANTILEAK 1302 Expanded PTFE Gasket

Descriptions:

Expanded PTFE gasket made of 100% expanded PTFE sheet, processed to produce a uniform and highly fibrillated microstructure with multi-directioned fibers. maintain all the chemical resistance of PTFE.

Applications:

Expanded PTFE is ideal for sealing uneven and damaged flanges, It's a soft, pliable, and very strong gasket with superior creep resistance and cold flow compared to standard PTFE products. Expanded PTFE Gasket is the best choice for economical plant-wide use on services up to 260°C and pressures up to 200 bar. It is suitable for use in lid seals, general chemical processing, sensitive flanges (FRP, plastic, etc...), corrosive and aggressive media and flanges in poor condition.
