

# ANTILEAK 1303 Expanded PTFE Tape Gasket

## Descriptions:

Expanded PTFE tape gasket is a PTFE product manufactured from 100% pure expanded PTFE. It is composed of special material with excellent resistance to aggressive chemicals as well as offering secure sealing under high pressures. Usually it's offered as tape, to facilitate the fitting, it's provided with adhesive backing strip on one side with protective layer, which will be removed before fitting.

## Applications:

Expanded PTFE tape gasket fits any shape instantly, the highly compressible tape forms a very tight seal that is long-lasting while also handling the rigors of virtually any chemical process. It can be applied to any sealing face, giving excellent sealing performance even at low bolt loads.

## Available dimensions:

| Width x Thickness (mm)                            | Roll length (m) | Apply to flange (DN) |
|---|-----------------|----------------------|
| 3 x 1.5   | 30              | 1/2" - 3/4"          |
| 5 x 2   | 20              | 1" - 1.1/2"          |
| 7 x 3   | 15              | 2" - 3.1/2"          |
| 10 x 4  | 8               | 4" - 6"              |
| 12 x 4  | 5               | 8" - 16"             |
| 14 x 4  | 5               | 18" - 20"            |
| 17 x 4  | 5               | 24" - 36"            |
| 20 x 7  | 5               | 36" - 60"            |
| 25 x 7  | 5               | >60"                 |
