

Technical Data of Flat Gasket Cutting Machine

☆ Flat Gasket Cutting Machine (double shearing):

Descriptions: Flat Gasket Cutting Machine is used for cutting non (semi)-metallic round gaskets or segments, inner and outer dia. will be finished synchronously. Especially for making reinforced graphite gasket.

Specifications:

1. Power: 0.75KW
2. Voltage: 380V
3. Dimensions: 900×550×870(mm)
4. Net weight: 150KGS
5. Working dimensions: $\Phi 20 \sim 2000\text{mm}$
6. Picture:
